## General Education Assessment

General Education is a group of courses that provide a broad educational foundation and promote lifelong learning and personal, professional, and social growth. The overall goals of General Education at Edison State are characterized using six learning outcomes. These outcomes are:

1. Demonstrate critical thinking skills in order to understand complex relationships; to evaluate claims of truth, aesthetic value, ethics, and morality; and to make appropriate choices and draw defensible conclusions;
2. Use written and spoken English effectively in a free exchange of ideas;
3. Appreciate the process and structure of mathematics and apply math to the analysis of the physical world;
4. Develop a mental habit which is open-minded, tolerant, appreciative of diversity and aware of global cultures;
5. Develop effective interpersonal skills;
6. Use information resources and apply basic methods of inquiry from many fields, including scientific method, social and scientific observation, cause-effect analysis, and artistic criticism.

Annually, through various methods, the General Education outcomes are assessed throughout the courses that are offered. The results of the assessments are then evaluated and alterations to the assessments themselves are made to increase their effectiveness. Also, if results indicate, changes may be made to General Education to enhance the focus relating to specific outcomes. Therefore, this assessment procedure allows Edison State to verify that students receiving a General Education have increased their competency regarding the General Education outcomes.

The core values are a set of principles that guide Edison State Community College in creating its educational programs and environment. They will be reflected in every aspect of the College. Students' educational experiences will incorporate the core values at all levels, so that a student who completes a degree program at Edison State Community College will not only have been introduced to each value but will have had them reinforced and refined at every opportunity. The General Education Outcomes are closely aligned with the Student Core Values: Communication, Ethics, Critical Thinking, Human Diversity, Inquiry and Respect for Learning, and Interpersonal Skills and Teamwork.

## General Education Assessment Report

| General Education Component | Critical Thinking |
| :--- | :--- |
| Coordinator | Assessment Committee |
| Academic Year: | $2021-2022$ |
| Report Summary | Dr. Amanda Bylczynski |

## Student Learning Objectives

1. Demonstrates the ability to identify and define the problem or question to be addressed within the context of this course
2. Clearly communicates the perspective, hypothesis, or position
3. Presents, assesses, and analyzes appropriate supporting data/evidence/sources
4. Identifies and assesses the key assumptions, positions, and biases of self and /or others
5. Articulates conclusions, implications, implementations, and/or consequences clearly

## Additional Data on Learning Outcomes

During the fall semester 2021FS, there were a total of 657 active sections for the identified courses, from which 472 sections were identified for the assessment. The unduplicated student count, randomly selected for assessment, equaled 1,570 representing $37 \%$ of the total student count of 4,156 . Assessment were returned for 1,423 of the students $(91 \%)$. Of these students, $1,310 \mathrm{had}$ assessments data reported by instructor.

| Instructional Method | Count of Students Assessed | Percentage of Grand Total |
| ---: | ---: | ---: |

## Analysis of the Findings

Based on the reported results, are there positive indications for the general education component, and if so, what are they?
Based on the 2021FR data, the averages for comparison of dual credit (CCP) and traditional courses are within reasonable margins. All average scores are within 0.1 of each other, demonstrating skill levels of the students are relatively equal regardless of campus. With the change of rubrics based on the analysis of previous findings (which showed more focus for technical analysis was needed), more courses identified their ability to assess their students' skill levels.

Overall abilities continue to increase since the original assessment findings in 2013. Students show good abilities to think critically with the strongest areas in identifying the problem and concluding findings. Positivity rates are also higher than in past semesters with only $10 \%$ of students not meeting acceptable levels of critical thinking skills.

When comparing first year to second year students, it was found that scores were higher, demonstrating their skills are being grown through their programs.

Based on the reported results, are there negative indications for the general education component in comparison to past assessments, and if so, what are they?
The data shows that the majority of those who scored a 1 (Lack of understanding) were primarily online students. This was found in all areas of the learning objectives. However, the students were still overall able to meet the 3.5 target when averaging all their scores. Students in lecture courses struggled the most to meet the target score.

It is also noted that African Americans tended to have the lowest overall scores for their critical thinking skills compared to other demographics. This is something that should be explored to
determine how to help them. It was also found that first generation students were less likely to meet the 3.5 overall target as compared to students whose parents' attended college.

While biasness and assumptions analysis are still high, the abilities of students have not changed. It remains the lowest skill of the students for critical thinking.

What interventions or changes from the previous assessment cycle were applied, and what were the results?

| Intervention/Change | Effect/Results |
| :--- | :--- |
| Assess and evaluate the rubric to address <br> courses stating they can't use the rubric | New rubric created, increased the number <br> of courses to include over 90\% of classes <br> that have a critical thinking component |

## Action Plan

What outcomes need improvement as indicated in this year's results? What interventions are planned for the next assessment cycle? What results do you anticipate as expressed in measurable terms?

| Outcome Needing <br> Improvement | Planned Intervention/Change | Target <br> Measurable Goal |
| :--- | :--- | :--- |
| Teacher Training on <br> Assessment | Create training on how to assess critical <br> thinking to study if this affects their ability to <br> score students. | Increase <br> understanding to <br> $90 \%$ |

It is hopeful that as new training for teachers is completed, it will help better assess the students to help develop co-curricular or curriculum support for classes with Critical Thinking components.

## General Education Assessment Report

| General Education Component | Inquiry |
| :--- | :--- |
| Coordinator | Assessment Committee |
| Academic Year: | $2021-2022$ |
| Report Summary | Dr. Amanda Bylczynski |

## Student Learning Objectives

1. Identify the most appropriate issue for assignment and effectively focus on it
2. Demonstrate strong interest in finding the best results and coming to the most convincing conclusions
3. Evaluate results and consider the quality and relevance of the evidence
4. Identify the best method of inquiry for the assignment and discipline
5. Apply method of inquiry to the assignment effectively

## Learning Outcome Findings

## Additional Data on Learning Outcomes

During the spring semester (2021SS), there were a total of 664 active sections for the identified courses, from which 369 sections were identified for the assessment. The unduplicated student count, randomly selected for assessment, equaled 800 representing $30 \%$ of the total student count of 2,668. Assessments were returned for 743 of the students ( $93 \%$ ). Of these students, 678 had assessments data reported by instructor.

| Instructional Method | Count of Students Assessed | Percentage of Grand Total |
| ---: | ---: | ---: |
| CCP Dual Enrollment | 213 | $22.19 \%$ |
| Independent Study | 1 | $0.17 \%$ |

## Analysis of the Findings

Based on the reported results, are there positive indications for the general education component, and if so, what are they?
Skills of the students assessed continue to show growth across all areas. All areas show a positivity rating of $89 \%$ or higher, meaning $89 \%$ of students were within the acceptable range for skill levels in their courses.

Both Evaluating Results and Finding Results had more than $10 \%$ of students scoring as deficient and below acceptable in their skills. Courses with the greatest number of students reported as not acceptable skill level were common $1^{\text {st }}$ semester courses including COM, ENG, and MTH. (See subject area data on page 6). While these had larger number of students not meeting the skill level expected, this does show that growth is occurring as courses in the later semesters of the guided pathway maps show higher skill levels.

The overall skill level for positivity ratings continues to rise; increasing into the $90 \%$ area for the first time since assessment began. Evaluating Results, while still the lowest score of all skills assessed, increased in the number of students assessed at acceptable or above levels moving from $87.5 \%$ in 2018SS to $89.4 \%$ in 2021SS.

When analyzing the changes over the last 6 years, Application has made the greatest progress in student skill level increasing by 0.23 followed by Identify the Issue at 0.19 . Identify the Issue is the only skill level that has surpassed 4.0 out of 5.0 possible.

The breakdown of student demographics shows that students in their second year of college have higher scores, which can indicate that skills are increasing as they go through college.

## Based on the reported results, are there negative indications for the general education component, and if so, what are they?

Evaluating results continues to be the lowest skill of students. While there was a growth of 0.14 since 2018, it has not risen above 3.9. Both Evaluating Results and Finding Results had more than $10 \%$ of students scoring as deficient and below acceptable in their skills. Finding Results had the lowest with $10.77 \%$ of all assessed students not meeting this skill level.

Three skill levels saw a decrease in the positivity rating from 2018SS to 2021SS of students who were rated as exercising "acceptable to exemplary" skills. This includes Identifying the issue which dropped $0.59 \%$, Finding Results which dropped $1.05 \%$, and Method of Inquiry, which dropped $0.5 \%$ since 2018SS.

African American students are more likely to struggle with these skills than white students. This is something to be looked at for equity improvements. Also, the majority of students who were identified showing an understanding of skills were online students.

What interventions or changes from the previous assessment cycle were applied, and what were the results?

| Intervention/Change | Effect/Results |
| :--- | :--- |
| N/A | None completed in the past |
|  |  |
|  |  |

## Action Plan

What outcomes need improvement as indicated in this year's results? What interventions are planned for the next assessment cycle? What results do you anticipate as expressed in measurable terms?

| Outcome Needing <br> Improvement | Planned Intervention/Change | Target <br> Measurable Goal |
| :--- | :--- | :--- |
| Teacher Training on <br> Assessment | Create training on how to assess Inquiry to <br> study if this affects their ability to score <br> students. | Increase <br> understanding to <br> $90 \%$ |

It is hopeful that as new training for teachers is completed, it will help better assess the students to help develop co-curricular or curriculum support for classes with Inquiry components.

## General Education Assessment Report

| General Education Component | Mathematics |
| :--- | :--- |
| Coordinator | Dr. Brian Murphy |
| Academic Year: | $2021-2022$ |
| Report Summary | Dr. Amanda Bylczynski |

## Student Learning Objectives

Outcome 1: Demonstrate critical thinking skills in a skills problem.
Outcome 2: Apply math in the practical world in a story problem

Are the learning outcomes being met? (Out of 3 points)

| Questions | 2021SS | 2022FS | 2022SS |
| :--- | :---: | :---: | :---: |
| \# Students Assessed | $\mathbf{2 0 9}$ |  |  |
| Demonstrate critical thinking skills in <br> a skills problem | 1.93 |  |  |
| Apply math in the practical world in a <br> story problem | 2.06 |  |  |
| Overall Average | 2.00 |  |  |

What is the positivity rating for each area? (\# of students scoring 2 or higher divided by the total students assessed)

| Questions | 2021SS | 2022FS | 2022SS |
| :--- | :---: | :---: | :---: |
| \# Students Assessed | $\mathbf{2 0 9}$ |  |  |
| Demonstrate critical thinking skills in a <br> skills problem | $66.5 \%$ |  |  |
| Apply math in the practical world in a <br> story problem | $71.4 \%$ |  |  |
| Overall Average | $\mathbf{6 8 . 4 \%}$ |  |  |

## 2021SS FINDINGS

During the spring semester (2021SS), there were a total of 23 active sections for the identified assessment. 209 Students were enrolled and assessed.

|  | $0=$ <br> Little or no <br> apparent <br> knowledge of the <br> topic (struggling to <br> know where to <br> start), | $1=$ Developing <br> (can start but not <br> finish or easily <br> finish) | $2=$ Proficient <br> (Understands <br> the concepts <br> but made minor <br> errors <br> Skill Level | $3=$ <br> Exemplary <br> (no <br> problems) | Total | Average <br> Score |

| Overall | 39 | 20 | 30 | 117 | 206 | 2.03 |

## RESULT ANALYSIS

Based on the reported results, are there positive indications for the general education component, and if so, what are they?

A positive indication was that the average assessment score of both outcomes for all sections was 2. An assessment of 2 indicates the student attained the outcome with proficiency though minor errors were found in the student's work.

Based on the reported results, are there negative indications for the general education component, and if so, what are they?

Assessment scores for some courses came in low. However, the sample size for these classes in this survey were too low to make conclusions for individual courses.

What interventions or changes from the previous assessment cycle were applied, and what were the results?

| Intervention/Change | Effect/Results |
| :--- | :--- |
| N/A |  |
