

Installing Office 365 Desktop

Before installing Office 365, you must remove all old Office products from your computer.

1

Log in to Office.com with your Edison email and credentials. You will be directed to the **HOME** screen, however if you click away from it, just choose the HOME icon on the left of your screen.

2

On the right of the HOME screen, click the **INSTALL OFFICE** button and choose **OFFICE 365 apps** from the drop down menu.

From there, follow the prompts to complete the download.
